

## UDT Europe 2009 shortly Submarines at the Cannes Palais des Festivals...

The 21st UDT, the international show for Undersea Defence technologies, will be held in the Cannes Palais des Festivals from June 9 to 11. The fair combines the Europe UDT and Asia/Pacific UDT that are both world scale events, and offers players in the sector located in the region and Provence Promotion an opportunity to show the region and high added value local know how at their best...

### > The undersea universe on land!

The UDT (Undersea Defence technologies) fair has been organised in Cannes after the 2008 edition in Australia, and it will offer participants an opportunity to discover the latest innovations in defence and undersea technology. The meeting will be punctuated by many conferences firmly facing the future with subjects concentrating particularly on the maritime safety of tomorrow and the ever-increasing role of unmanned submarine robots.

### > The South on the crest of the wave ...

UDT is a wonderful opportunity for an in-situ demonstration of the link between the region and marine and submarine activity, with the support of local enterprises. Ship-building decision makers around the world, defence scientists and world leaders in submarine construction can visit PACA's Sea Cluster stand to discover the latest innovations by companies located in the PACA region. The trade fair will also provide an opportunity to (re)discover stands of major names in the sea world such as Comex, Ifremer, Cnim, Thales Underwater..., present in the region.

### > ... And with the wind behind the Bouches-du-Rhône!

Provence Promotion's presentation will be made on the PACA Sea Cluster stand, alongside economic development agencies for the Var and Alpes-Maritimes, showing the know how of its region and installation sites: in La Ciotat (Calanques Mixed Development Zone), Marseille (PAM - Port Authority of Marseille), Port-de-Bouc (dockside) and Cassis (Sea Technopark).

[For further information](#)

**Useful information: Provence Promotion will welcome all participants on stand No. 46 at 12h30 on June 10 for the Provence cocktail!**

### **The undersea activity in the Bouches-du-Rhône department:**

- Comex: Human or robot-controlled undersea engineering and actions
- Cybernetix: Industrial robotics, ROV, AUVI  
xsea (13): sonars
- Acsa (13): Submarine GPS positioning
- Subseatech (13): Action and instrumentation systems for submarine and marine environments (mini-rov)
- Helion Fuel cells (13): Manufacturer of energy systems based on fuel cells and electrolyzers for backup power applications ...
